## **PROFESSIONAL EXPERIENCE**

### **Lead Consultant**

June 2016-Present

*RTR Consultants, Newark, DE*

- Leader of a small consulting company specializing in healthcare analytics and project management
- Work with clients ranging from small to medium-sized organizations that deliver healthcare-related services

### **Technology Business Consultant**

Nov 2016 – Jan 2018

*Delaware Small Business Development Center, Newark, DE*

- Maintained a portfolio of nonprofit and for-profit corporate partners in and around the Delaware area by networking at local business events
- Served as Program Director for Digital Compass, a program I constructed to educate future business leaders on how to implement e-commerce and digital marketing strategies
- Advised as a member of the University of Delaware Technology Transfer leadership team, educating start-ups about market entry and competitive analysis
- Collaborated with the Manager of Technology Development to oversee the administration of the DatAssured cybersecurity and SBIR/STTR educational programs
- Executed strategic initiatives outlined by organization leadership, benchmarking against past goals to plan for growth and diversification
- Managed a series of interdisciplinary projects for clients that were completed by students in the Management Information Systems and Business Administration undergraduate programs at the University of Delaware

### **Data Manager**

Oct 2014 - Nov 2016

*Kirk & Associates (Medical Billing for Emergency Room Physicians), Newark, DE*

- Collaborated with members of the leadership team to develop marketing strategies, managed information technology, and lead the supervisory team at quarterly board meetings
- Managed concept-to-launch of business intelligence software tools, SQL database extractions, and SaaS payment projects
- Supervised extraction of data from company ERP systems and manipulation, using programs I developed for professional reports and client presentations
- Communicated one-on-one with clients (physicians) to explain analyses of financial payouts and physician productivity reports
